

IEEE INFOCOM 2016 CALL FOR DEMOS/POSTERS

We are soliciting technical demonstrations or posters showing innovative and original research. IEEE INFOCOM is interested in demonstrations of technology that validate important research issues and results, or showcase realistic applications. Topics of interest are the same as research topics of IEEE INFOCOM - see the main conference call for papers at:

<http://infocom2016.ieee-infocom.org/sites/infocom2016.ieee-infocom.org/files/u42/INFOCOM%202016%20CFP.pdf>

Abstracts describing the Demos and Posters will be indexed by IEEE-Xplore and will be distributed with the official conference proceedings. Authors must be present during the Demo and Poster sessions. No show will preclude publication in IEEE-Xplore. Please consult the Demo/Poster Co-Chairs (see contacts below) if you are uncertain whether your demo/poster falls within the scope of the conference. IEEE INFOCOM 2016 will present a Best Poster Award and Best Demo Award to an outstanding submission in these categories, respectively.

DEMO/POSTER SUBMISSION INSTRUCTIONS

Submissions should be a two-page proposal/abstract in PDF format adhering to the relevant INFOCOM submission instructions that are available at the following URL:

<http://infocom2016.ieee-infocom.org/authors/paper-submission>

However, unlike the main track, there is no need for double blind submissions (names, affiliations, and e-mail addresses are required). Please review the link above for margin, font, and other typesetting/presentation decisions only. Also, be as specific as possible in describing what you will demonstrate or post. Demos should describe the power, connectivity, equipment, space and setup time required.

If a demonstration requires special arrangements, please send an email to Local Arrangement Co-Chairs: Katia Obraczka, UC Santa Cruz (katia@soe.ucsc.edu) and Cedric Westphal, Huawei USA (cedric@soe.ucsc.edu). Abstracts of accepted demos/posters will be included in the INFOCOM 2016 Proceedings CD.

Submissions should be made via EDAS conference management system. In the submission, please select one of two tracks: Live Demonstration or Poster Presentation. In addition, a 90 second web video is encouraged to show a demo.

IMPORTANT DATES

Two-page demo/poster abstract due by: 11:59pm (EST), January 31, 2016 (**firm**)

Notification of acceptance: February 15, 2016

IEEE INFOCOM 2016 Demo/Poster Session dates: to be announced

IEEE INFOCOM 2016 Demo/Posters Co-Chairs:

- **Qun Li**, College of William and Mary, USA (liquan@cs.wm.edu)
- **Joseph Camp**, Southern Methodist University, USA (camp@smu.edu)
